

BRIO

**Wooden
Railway**

Timetable.

The path from the simple circle to extensive layouts is child's play with the BRIO® Railway. Everything is compatible and easily expandable to keep up with the many stages of your child's development. It's simple to select components that are appropriate for her age, skill and interest levels. Following are some ideas for different layouts. But, remember, these are

Railway set:
33114

Add this track.

33336 Assorted track.
(4 x e; 2 x d; a; a1; a2; b2; c2)

33351 Viaduct.
(3 pieces)

Track from Railway set **33114**
Total amount of track = 22 pieces
Layout dimensions = 18" x 47" or 46 x 119 cm.
--- track underneath viaduct

suggestions only. Children are creative and usually want to develop their own ideas. It's important to let them do just that. Also, keep in mind that it's not necessary to duplicate the picture on the product box or to use all the pieces included. The Railway is an excellent example of an open-ended toy, allowing your child to play in an infinite variety of creative ways.

Add this track.

33334 Short straight tracks.
(4 x a1)

33335 Medium straight tracks.
(4 x a)

33336 Assorted track.
(4 x e; 2 x d; a; a1; a2; b2; c2)

33337 Short curved tracks.
(4 x e1)

33345 Switching and crossing track.
(k)

33362 Tunnel.

Track from Railway set **33114**
Total amount of track = 33 pieces
Layout dimensions = 31" x 37" or 79 x 94 cm.

Add this track.

33334 Short straight tracks.
(4 x a1)

33336 Assorted track.
(4 x e; 2 x d; a; a1; a2; b2; c2)

33346 Curved switching tracks.
(l; m)

33349 Crossing track.
(h; r; s; 2 warning crosses)

Track from Railway set **33114**
Total amount of track = 29 pieces
Layout dimensions = 32" x 35" or 81 x 89 cm.

Start Simply.

To begin, start with just a few simple pieces. Your young "engineer" will be fascinated by the challenge of matching the magnetic coupling of one train car to an "attracting" coupling of another car. He'll get the most enjoyment out of chunky, easy-to-handle bridges, playing peek-a-boo through tunnels, and laying track out in straight or curving lines.

Railway set:
33120

Layout dimensions
17" x 27"
or 43 x 69 cm.

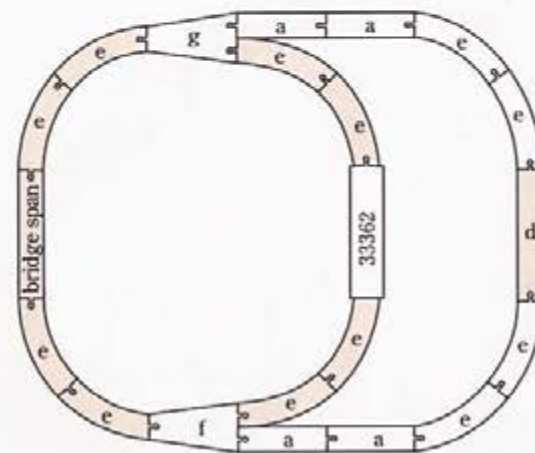

Add this track.

- 33333 Mini straight tracks. (2 x a2; b2; c2)
- 33349 Crossing track. (h; r; s; 2 warning crosses)
- 33360 Turntable.
- 33365 Engine shed. (Engine shed; f; engine)

□ Track from Railway set 33120
Total amount of track = 21 pieces
Layout dimensions = 39" x 23" or 99 x 58 cm.

Because your 3-4 year old likes repetition in his play, a few trains, tracks and a tunnel or bridge are enough. He'll learn from playing with them over and over again. Add more when your child is ready to explore further and expand his world of play. The possibilities for new designs - and new learning experiences - are virtually limitless.

Add this track.

- 33335 Medium straight tracks. (4 x a)
- 33342 Curved tracks. (4 x e)
- 33348 Switching tracks. (f; g)
- 33362 Tunnel.

□ Track from Railway set 33120
Total amount of track = 21 pieces
Layout dimensions = 35" x 28" or 89 x 71 cm.

Add this track.

- 33336 Assorted track. (4 x e; 2 x d; a; a1; a2; b2; c2)
- 33337 Short curved tracks. (4 x e1)
2 boxes
- 33345 Switching & crossing track. (k)
- 33346 Curved switching tracks. (l; m)

□ Track from Railway set 33120
Total amount of track = 32 pieces
Layout dimensions = 36" x 26" or 91 x 66 cm.

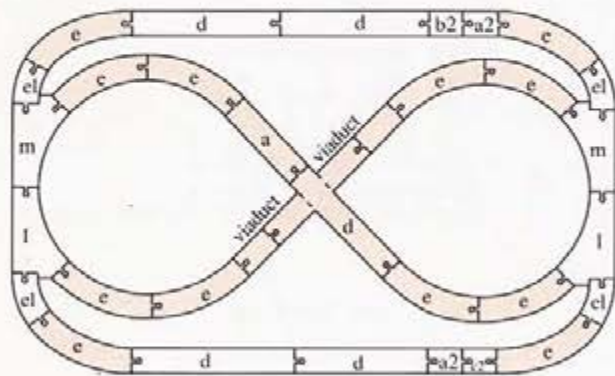

No "end of the line."

Additional pieces can add to the fun for your preschooler who is ready for cooperative play. Her imagination flourishes with more track, bridges, vehicles and accessories that expand role-playing capabilities. And, as your child's interest in space and shapes expands, she'll find the

answers to all sorts of puzzles through the building of new track layouts. As your child continues to develop, she becomes interested in designing larger layouts that meander through the whole room. As she designs, builds and manipulates more and more complicated loops and curves, she's also building her confidence level.

Railway set:
33125

Layout dimensions
17" x 39" or 43 x 99 cm.

Add this track.

- 33333** Mini straight tracks.
(2 x a2; b2; c2)
- 33341** Straight tracks.
(4 x d)
- 33337** Short curved tracks.
(4 x e1)
- 33346** Curved switching tracks.
(l; m)
2 boxes

□ Track from Railway set **33125**
Total amount of track = 33 pieces
Layout dimensions = 24" x 39" or 61 x 99 cm.
--- track underneath viaduct

Add this track.

- 33336** Assorted track.
(4 x e; 2 x d; a;
a1; a2; b2; c2)
- 33341** Straight tracks.
(4 x d)
- 33346** Curved switching
tracks.
(l; m)
2 boxes
- 33362** Tunnel.

□ Track from Railway set **33125**
Total amount of track = 37 pieces
Layout dimensions = 35" x 53" or
89 x 135 cm.
--- track underneath viaduct

Create a World.

As your child moves into more realistic play, he'll begin to duplicate everyday scenes, such as the three playscapes that follow. He also begins to build them upward, using his problem-solving abilities

Railway set: **33131**
Layout dimensions = 20" x 49" or 51 x 125 cm.

to work with bridges and supports. As he adds bridges, tunnels, cranes, houses and boats to develop a world that is his alone, he's building confidence in his ability to control his environment.

Railway set: **33134**
Layout dimensions = 44" x 48" or 112 x 122 cm.

In the city.

Note: The three layouts for 33131, 33134 and 33143 illustrate how complex the BRIO Railway can be. (There are leftover pieces not shown.)

□ Track from Railway set **33134**
Total amount of track = 83 pieces
Layout dimensions = 48" x 57" or 122 x 145 cm.

A First Class Ticket.

Your older child has more manual dexterity and control now. The addition of switches challenges her to build more complex layouts. Bridges, turntables and multilevels of track help in developing an understanding of space, size, balance and pattern.

Railway set: **33143**
Layout dimensions = 24" x 64" or 61 x 163 cm.

By the sea.

Travel Connections.

Because the BRIO® Railway is a modular system, your child will discover innumerable ways to create a layout - and then rearrange it by substituting equivalent pieces. Many of the pieces in the following pages are interchangeable. The chart below will help you choose the best assortment for your child's system. However, this is only a sampling. Your child will discover more interchangeable parts as she continues to explore.

•**Extra tip.** Eight curved pieces make a complete circle, whether you use a long curve or short curve. The only difference will be the radius of the circle.

Workin' on the Railroad.

The wide assortment of available track pieces allows your child to build his system in an unlimited number of ways. He can connect pieces in either a flat or a multilevel configuration. • **The Direct Route.** Almost all straight track pieces have standard +/- connections. The exceptions to this rule are the mini tracks which also have +/+ and -/-. • **Around the**

33360
Turntable

33361
Turntable

Bend. Curved tracks have grooves on both sides. To change the direction of the curve, just turn the track over. • **Rerouting.** Adding track and switches is essential to opening up new options for the child who is ready to expand his layouts. Mini track is needed to change polarity when you add a switch or to link two plus or two minus ends of track.

Over, Under and Through.

Bridges and tunnels add complexity, fun and realism. The BRIO® Railway System is designed to be as realistic as possible. For example, the giraffe in the circus train won't fit through the tunnel or under some of the bridges. Your child will have to reroute the train...just like a real engineer would. • As you expand your child's system, keep in mind that bridge

spans and tunnels are usually equal to one or more pieces of long straight track. So, to balance the layout, when you add a tunnel or bridge, an equal amount of straight track is usually needed. However, all layouts need not be closed - your child will come up with her own innovative solutions. Also, note that bridge supports require ascending track leading up to and down from the bridge.

Viaduct.

Full Speed Ahead.

Whether your child is taking passengers, circus animals or just his imagination for a ride, there's a BRIO® train that fits the ticket. The small trains are just right for chugging around tight curves. The large trains have double bogies to help them take the bend. And the variety is good for hours and hours of fun.

All Aboard.

Typically, your child's railway adventure begins with a basic set. Next, you'll add track. Then, a tunnel, bridges and more trains. Eventually, your child will need cranes, work vehicles and other accessories. Then she's ready for playscapes. All BRIO® accessories are excellent toys that will

be enjoyed in play with or without the Railway. You'll delight in watching your child play with them, discovering an endless range of ways to put her railway together. Sometimes you may join in the play; but it's important to give your child the time and space to play and learn on her own.
