

# Wooden Railway

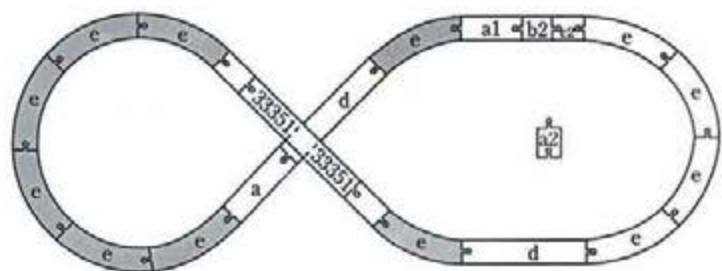

# Timetable.

The path from the simple circle to extensive layouts is child's play with the BRIO® Wooden Railway. Everything is compatible and easily expandable to keep up with the many stages of your child's development. It's simple to select components that are appropriate for her age, skill and interest levels. Following are some ideas for different layouts. But, remember,

Railway set:  
**33115**

Layout dimensions  
17-1/2" x 17-1/2"  
or 44 x 44 cm.

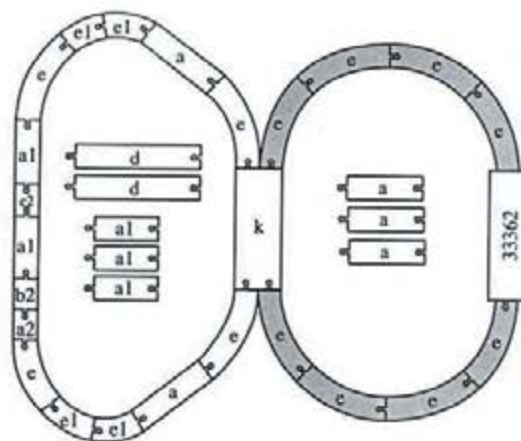

Add this track.

**33336** Assorted track.  
(4 x e; 2 x d; a; a1; a2; b2; c2)

**33351** Viaduct.  
(3 pieces)

■ Track from Railway set **33115**  
Total amount of track = 22 pieces  
Layout dimensions = 18" x 47" or 46 x 119 cm.  
--- track underneath viaduct

these are suggestions only. Children are creative and usually want to develop their own ideas. It's important to let them do just that. Also, keep in mind that it's not necessary to duplicate the picture on the product box or to use all the pieces included. The Wooden Railway is an excellent example of an open-ended toy, allowing your child to play in an infinite variety of creative ways.

Add this track.

**33334** Short straight tracks.  
(4 x a1)

**33335** Medium straight tracks.

**33336** Assorted track.  
(4 x e; 2 x d; a; a1; a2; b2; c2)

**33346** Curved switching tracks.  
(l; m)

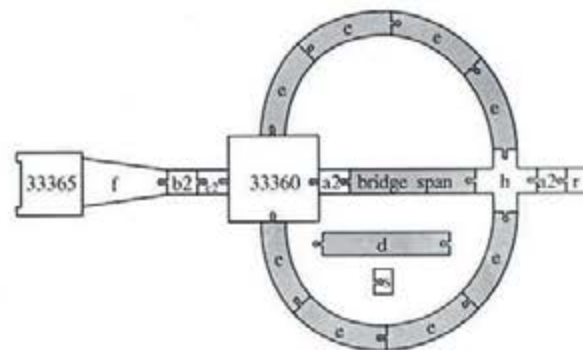

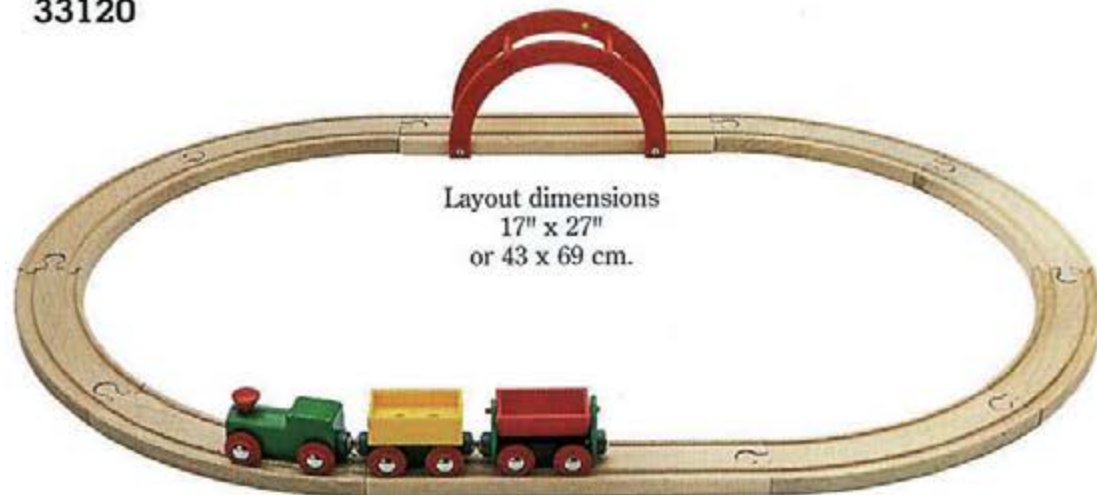

**33387** Buffer stops. (h; r; s)

■ Track from Railway set **33115**  
Total amount of track = 29 pieces  
Layout dimensions = 32" x 35" or 81 x 89 cm.

# Start Simply.

To begin, start with just a few simple pieces. Your young "engineer" will be fascinated by the challenge of matching the magnetic coupling of one train car to an "attracting" coupling of another car. He'll get the most enjoyment out of chunky, easy-to-handle bridges, playing peek-a-boo through tunnels, and laying track out in

Railway set:

■ Track from Railway set **33120**  
Total amount of track = 21 pieces  
Layout dimensions = 39" x 23" or 99 x 58 cm.

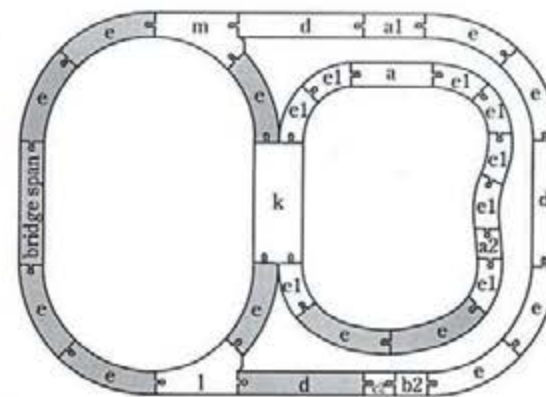

straight or curving lines. Because your 3-4 year old likes repetition in his play, a few trains, tracks and a tunnel or bridge are enough. He'll learn from playing with them over and over again. Add more when your child is ready to explore further and expand his world of play. The possibilities for new designs - and new learning experiences - are virtually limitless.

**Add this track.**

- 33335** Medium straight tracks.  
(4 x a)

- 33346** Curved switching tracks.  
(l; m)

■ Track from Railway set **33120**  
Total amount of track = 32 pieces  
Layout dimensions = 36" x 26" or 91 x 66 cm.

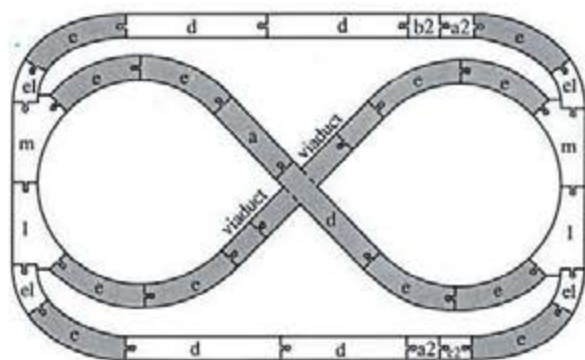

# No "end of the line."

**A**dditional pieces can add to the fun for your preschooler who is ready for cooperative play. Her imagination flourishes with more track, bridges, vehicles and accessories that expand role-playing capabilities. And, as your child's interest in space and shapes expands, she'll find the answers to all sorts of puzzles through

Railway set:  
33125

the building of new track layouts. As your child continues to develop, she becomes interested in designing larger layouts that meander through the whole room. As she designs, builds and manipulates more and more complicated loops and curves, she's also building her confidence level.

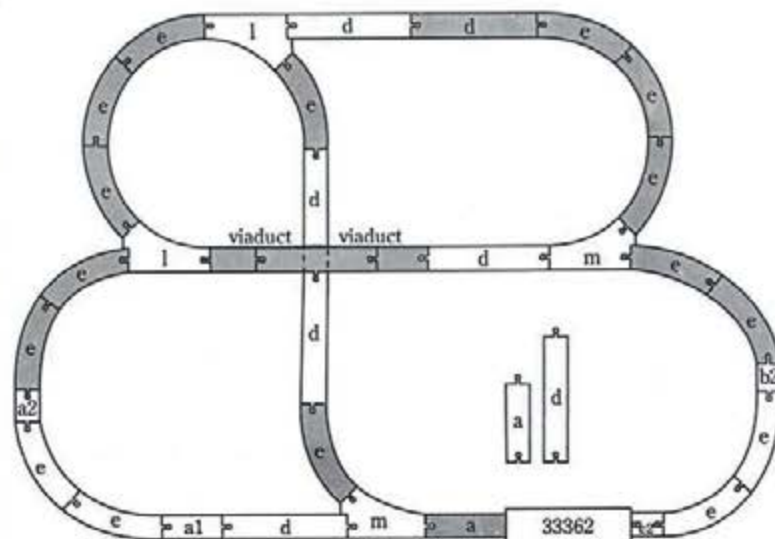

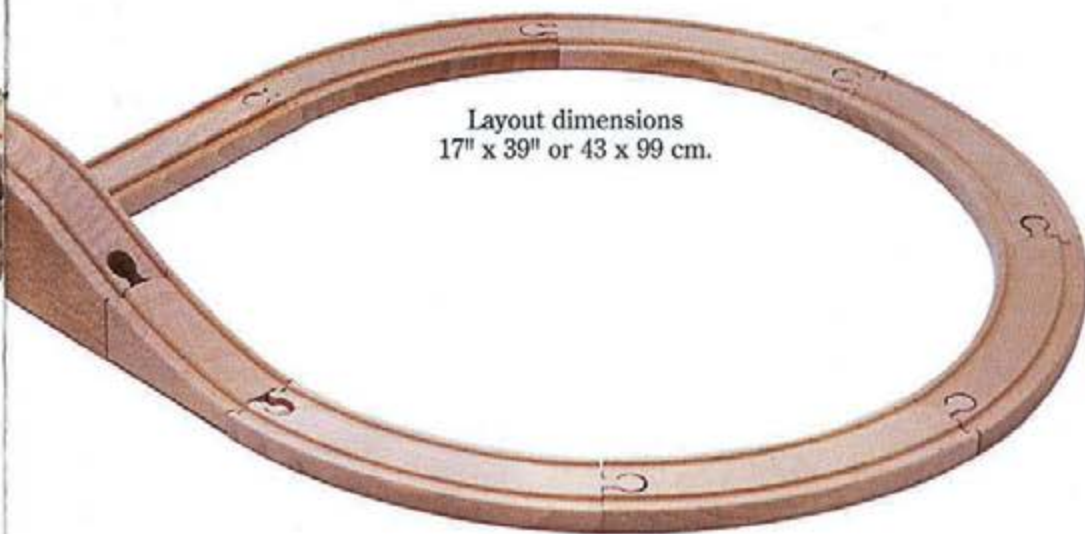

### Add this track.

Total amount of track - 51 pieces  
Layout dimensions - 36" x 57" or 91 x 145 cm.  
- - - track passing underneath overhead track

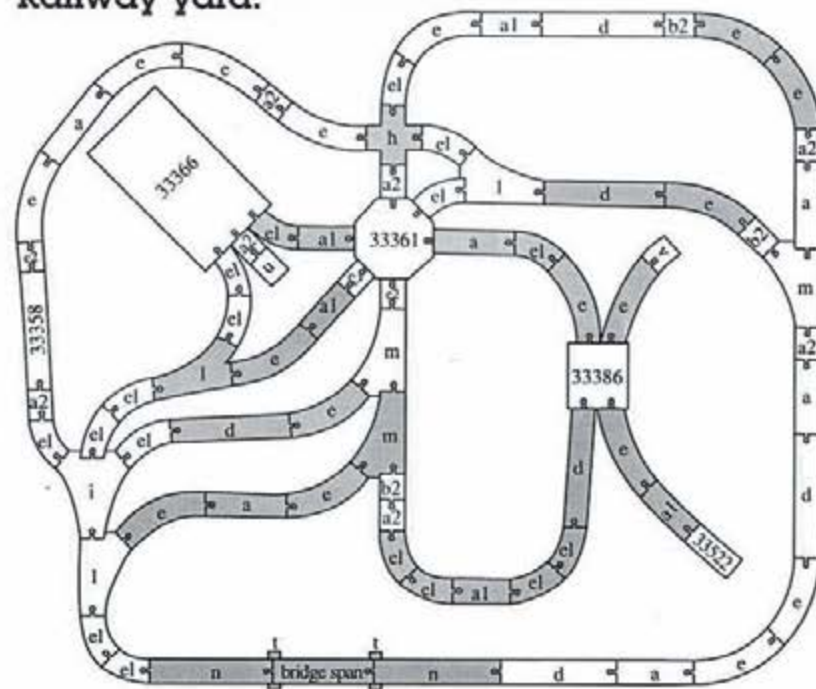

with bridges and supports. As he adds bridges, tunnels, cranes, houses and boats to develop a world that is his alone, he's building confidence in his ability to control his environment.

Railway set: 33134  
Layout dimensions = 44" x 48" or 112 x 122 cm.

## Railway yard.

### Add this track.

- |   |
|---|
| 33331 Ramp tracks. (2 x u; 2 x v)   |
| 33333 Mini straight tracks. (2 x a2; b2; c2) 3 boxes                            |
| 33335 Medium straight tracks. (4 x a)   |
| 33337 Short curved tracks. (4 x e1) 3 boxes                                     |
| 33341 Straight tracks. (4 x d)  |
| 33342 Curved tracks. (4 x e) 2 boxes  |
| 33346 Curved switching tracks. (l; m) 2 boxes                                   |
| 33347 Double curved switching tracks. (i; j)                                    |
| 33358 Mountain tunnel. Concrete transporter. (truck and trailer; approach ramp) |
| 33522 Turntable.  |
| 33361 Big engine shed.  |
| 33386 Overhead crane.   |

Track from Railway set 33134  
Total amount of track - 83 pieces  
Layout dimensions - 48" x 57" or 122 x 145 cm.

Note: The three layouts for 33131, 33134 and 33143 illustrate how complex the BRIO® Wooden Railway can be. (There are leftover pieces not shown.)

# A First Class Ticket.

**Y**our older child has more manual dexterity and control now. The addition of switches challenges her to build more complex layouts. Bridges, turntables and multilevels of track help develop an understanding of space, size, balance and pattern.

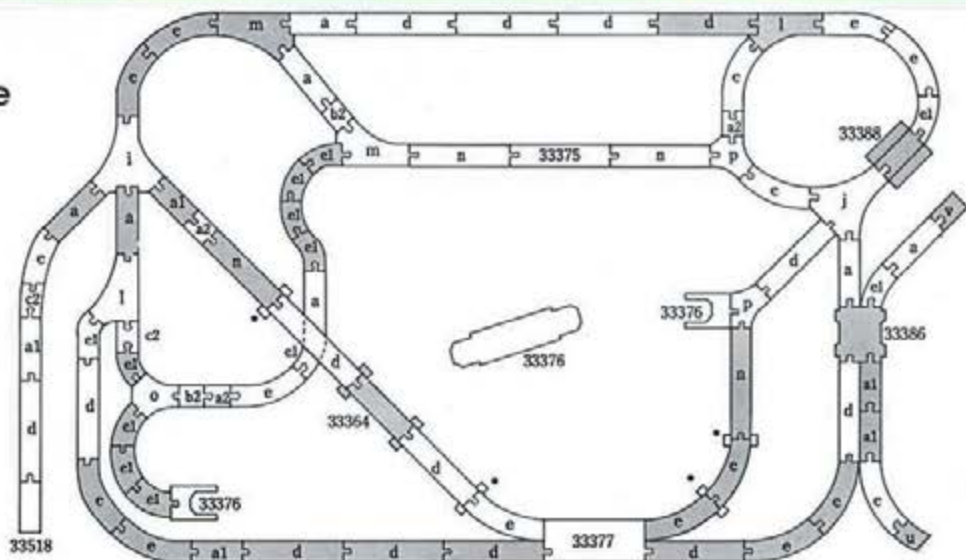

Railway set: 33143  
Layout dimensions = 31" x 57" or 79 x 145 cm.

## By the sea.

# Travel Connections.

**B**ecause the BRIO® Wooden Railway is a modular system, your child will discover innumerable ways to create a layout - and then rearrange it by substituting equivalent pieces. The chart below will help you choose the best assortment for your child's system. However, this is only a sampling. Your child will discover more interchangeable parts as she continues to explore. • **Extra tip.** Eight curved pieces make a complete circle, whether you use a long curve or a short curve. The only difference will be the radius of the circle.

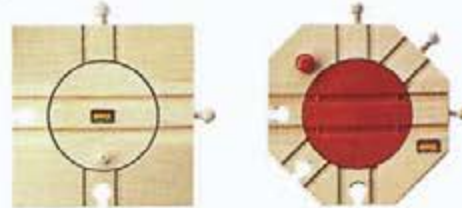

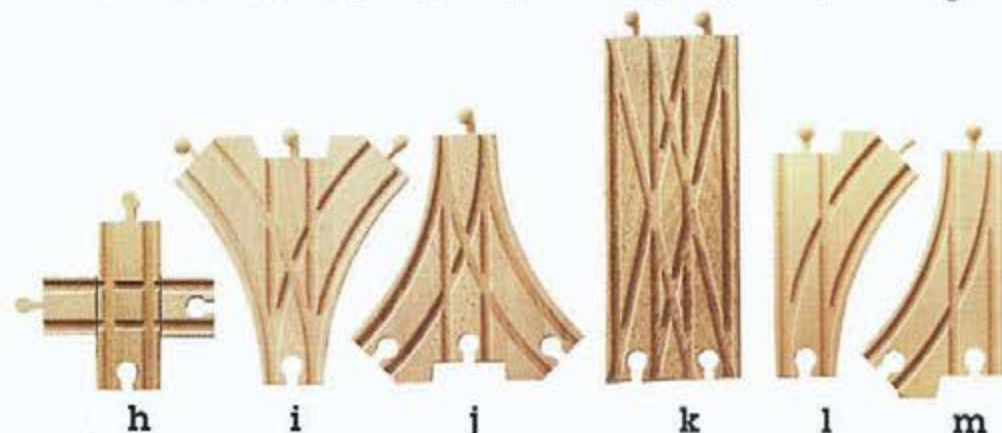

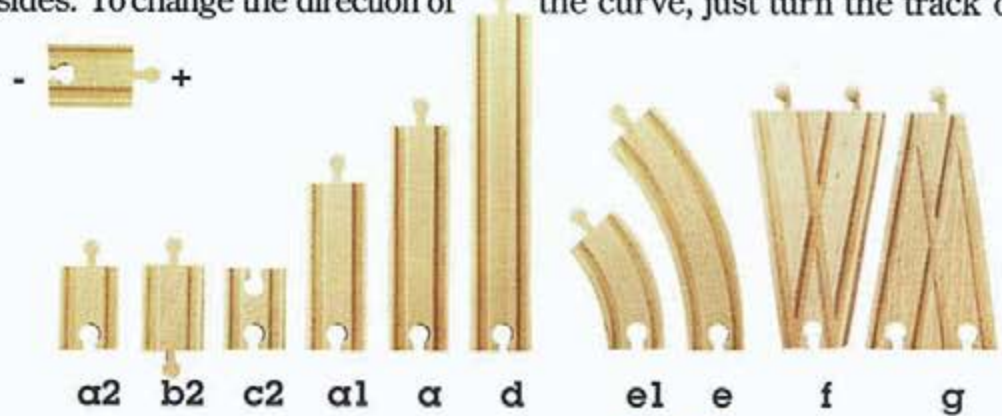

33362  
Tunnel

33351  
Viaduct

# Workin' on the Railroad.

The wide assortment of available track pieces allows your child to build his system in an unlimited number of ways. He can connect pieces in either a flat or a multilevel configuration. • **The Direct Route.** Almost all straight track pieces have standard +/- connections. The exceptions to this rule are the mini tracks which also have ++ and -/-. • **Around the Bend.** Curved tracks have grooves on both sides. To change the direction of the curve, just turn the track over.

33360 Turntable  
33361 Turntable

• **Rerouting.** Adding track and switches is essential to opening up new options for the child who is ready to expand his layouts. Mini track is needed to change polarity when you add a switch or to link two plus or two minus ends of track.

<p>33331 (2 x u; 2 x v) Ramp tracks.</p>	<p>33333 (2 x a2; b2; c2) Mini straight tracks.</p>	<p>33334 (4 x a1) Short straight tracks.</p>	<p>33335 (4 x a) Medium straight tracks.</p>
<p>33341 (4 x d) Straight tracks.</p>	<p>33332 (2 x n) Ascending tracks.</p>	<p>33337 (4 x e1) Short curved tracks.</p>	<p>33342 (4 x e) Curved tracks.</p>
<p>33336 (11 pieces) Assorted track.</p>	<p>33354 (21 pieces) Graded supports.</p>	<p>33355 (6 x t) Supports.</p>	<p>33356 (4 pieces) Stacking supports.</p>

# Over, Under and Through.

**B**ridges and tunnels add complexity, fun and realism. The BRIO® Wooden Railway System is designed to be as realistic as possible. For example, the giraffe in the circus train won't fit through the tunnel or under some of the bridges. Your child will have to reroute the train...just like a real engineer would. • As you expand your

child's system, keep in mind that bridge spans and tunnels are usually equal to one or more pieces of straight track. So, to balance the layout, when you add a tunnel or bridge, an equal amount of straight track is usually needed. However, all layouts need not be closed - your child will come up with her own innovative solutions. Also, note that bridge supports require ascending track leading up to and down from the bridge.

# Full Speed Ahead.

**W**hether your child is taking passengers, circus animals or just his imagination for a ride, there's a BRIO® train that fits the ticket. The small trains are just right for chugging around tight curves. The large trains have double bogies to help them take the bend. And the variety is good for hours and hours of fun.
